PROFILE

I'm a graphic designer and frontend developer. I create branding and marketing materials—logos, social graphics, and banners—for digital campaigns. I'm also comfortable designing responsive interfaces for web use. I enjoy turning ideas into real projects that people can use. I've worked with tools like Photoshop and Illustrator. I'm focusing on growing my skills through personal projects that let me build real-world experience.

WORK EXPERIENCE

MMC Company - Graphic Designer
Part-time (2023 – 2024)

- Designed marketing materials, logo concepts, and brand assets for a local motors and moto company.
- Worked on flyers, social media graphics, and banner designs using Photoshop and Illustrator.
- Helped shape the company's brand identity and visual style for digital

Brand Identity for Caalim Academy
Personal project

- Developed the complete brand identity for "Caalim," a new online academy focused on teaching the Somali language to the diaspora
- The project involved creating a friendly logo, a clear typography system, and user interface (UI) design mockups for the web platform

Logo Design for Islamic Institute
Personal project

- Designed a logo for Waaberi Institute for Islamic Studies.
- Worked on flyers, social media graphics, and banner designs using Photoshop and Illustrator.
